QUR'AN-FIRST ARABIC · STUDENT EDITION

80/20 Arabic

31-week learning path · Vocabulary, structure, retrieval and transfer

Learn to see the Qur'an you already memorise

This workbook accompanies your own Madani 15-line Mushaf and FSTU Naḥw (نحو) / Ṣarf (صرف) books.

Each teaching week

1. Retrieve old learning. 2. Learn seven lexical words. 3. Connect English and Arabic technical terms. 4. Apply one idea to the Qur'an page. 5. Retrieve again after a gap.

The key rule

Do not translate first. Identify, connect, justify with evidence, then translate.

How to use this course

In the weekly class, work through the focused lesson with your teacher. Between classes, keep practice short and spaced.

Noun	اسم	Verb	فعل
Particle	حرف	Nominal sentence	جملة اسمية
Verbal sentence	جملة فعلية	Pronoun	ضمير
Preposition phrase	جار ومجرور	Possessive construction	إضافة
Relative pronoun	اسم موصول	Relative clause	صلة الموصول
Negation	نفي	Word-by-word analysis	تركيب

Retrieval rule

Attempt to remember before you reveal or reread. Wrong answers are useful: correct them and return to them later.

Transfer rule

Never stop at naming a pattern. Point to the Arabic evidence, explain how the words connect, and look for the same feature on a different memorised page.
